the heart is,  
Hickory hardwood  
is where the  
warmth begins.

Each floor has  
been masterfully  
crafted and  
engineered to evoke  
your emotions.

# Hickory Impressions Homestead

## **new chisel cut**

Australian Select Timbers is the first to create a new timber floor for the Australian market with new chisel cut techniques producing a floor that is rustically fashioned to a true timber look.

Artistically finished by our skilled craftsman using carefully selected top quality hardwood from the USA, we work the wood into a floor that displays knots, mineral streaks, bird peeks, cracks, hand scraping & tool marks. This new fashioned floor is the hardest and simplest floor that any family can maintain and preserve the wonderful character for many, many years to come.

# Hickory Profile

## a sustainable option

The American hardwood industry dates back to the first European settlers. There is a wealth of experience in processing native hardwoods of North America. Few other countries can boast the success America has had in the sustainability of its hardwood forests, due to the intensive application of Best Management Practices (BMP). The hardwood forests of America support a vibrant healthy standard of timber, as well as a large diverse wild life population.

Hickory is therefore not classified as a species in danger. Hickory is sort after for many applications due to its strength, toughness hardness & stiffness.

American Hickory is most commonly used in tool handles, drumsticks, baseball bats, wooden wheels, furniture and flooring.

Our chisel cut Hickory Impressions Homestead is meticulously handcrafted with a range of board lengths to replicate a traditional solid timber floor. Our 2100mm long board is accompanied with random lengths from 600mm upwards and the new 178mm wide plank complements all design styles adding a tasteful authenticity to any style of home.

Hickory Impressions Homestead has been lightly hand scraped with surface brushing and tool marks which have been tastefully applied to the board surface giving it that time-worn look and texture, harking back to a style that is historic and enduring.

The Tongue & Groove joining system.

# Tongue & Groove System

## rustic & traditional edges

Australian Select Timbers has chosen to go for a T&G Joining System (Tongue & Groove) this system allows us to create that rustic look along the edge of the board where we have rounded edges with tool marks replicating a floor from the early 17th century homes.

Hickory Impressions Homestead T&G joining system replicates the installation of solid timber flooring. PVA glue is to be applied along the groove of each board then gently tapped together with a hammer.

This proven system produces a strong traditional look and a floor that will last for many years to come.

It is tried and true method of flooring that has worked brilliantly over the centuries and will continue to do so in the future.

There are less issues in installation, less issues with movement, more versatility with installation methods, and confidence that refreshing is possible if required.

# Care & Maintenance

## take care of your floor

Australian Select Timbers® brings you stylish, sustainable, sophisticated and simply beautiful floors but taking care of them to preserve their magnificent finish and quality presence is a must. By following a few simple care and maintenance guidelines your floor will continue to be a thing of beauty for years to come.

### Preventative Maintenance

- Installing good quality mats inside and outside of external doors to trap grit and remove moisture from shoes is a sensible precaution and will reduce the possibility of scratches.
- In high traffic areas or areas where spillage may occur the use of mats is recommended to give added protection
- All furniture should have felt pads fitted to the base of legs or on other areas in contact with the floor to avoid scratches. On heavy furniture felt backed castors can be used if required.
- Avoid using wheeled chairs i.e. office furniture or ensure that a large good quality office mat is used to prevent indentations in the timber.
- Rubber based items e.g. the backing for matting, castors under furniture and rubber tipped furniture feet should not be in direct contact with the floor.
- Keep pet's nails trimmed to protect the floor from scratches.
- All timber reacts when exposed to direct sunlight and this may cause colour changes or fading. Curtains, blinds or UV resistant films on windows should be considered to reduce the exposure to direct sunlight and protect the flooring. Furniture and rugs should be moved occasionally so that the effect of sunlight on the floor is uniform.
- Any materials spilt on the floor should be wiped up immediately.
- Maintaining the temperature and humidity within a reasonably consistent range will keep the floor stable.

### Cleaning

- Dry cleaning of the floor should be carried out regularly to remove loose dirt, grit and dust. Use a *SelectCare+* Dusting Pad or soft broom. If vacuum cleaning, the cleaning head must have a soft brush so as to not damage the floor.
- Use a *SelectCare+* Spray Mop with *SelectCare+* Hard Floor Cleaner to clean the floor surface when required; dry clean the floor first. Do not 'wet' mop the floor anytime as excessive amounts of water may cause damage.

### Avoid the following:

- Indentation from stilettos or spiked heels.
- Pulling or pushing furniture or other objects across the floor.
- Avoid using a steam mop, abrasive cleaning materials or harsh detergents / household cleaners on the floor. Using these cleaning methods / materials will harm the surface of the floor and may cause physical damage to the boards.
- Do not use solvents of any kind to clean the floor. Methylated Spirits, Turpentine or similar materials will damage the floor surface.

Australian Select Timbers® has a Lifetime Structural Warranty, 20 Year Residential & 5 Year Commercial Wear Warranty.
